

TECHNIGRAPH

Your Partner in Creative Decorating Solutions

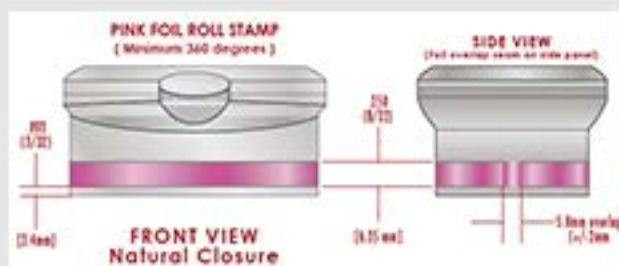

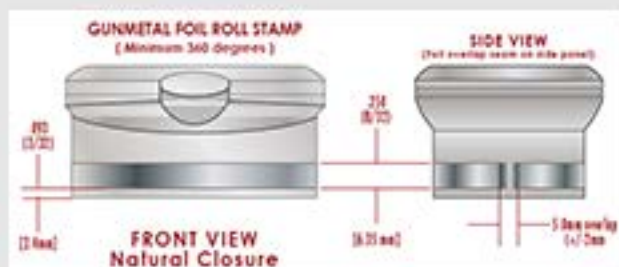

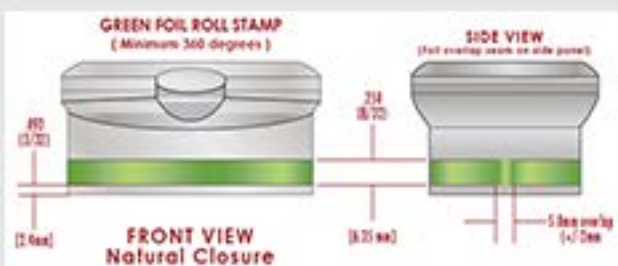

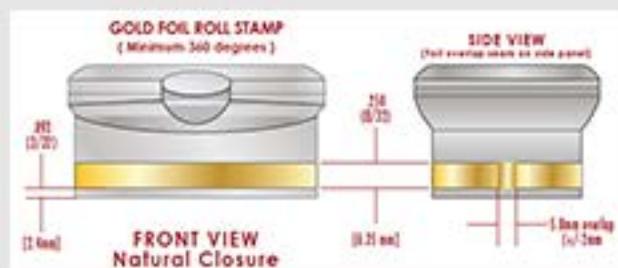

CLOSURE DECORATIONS

Technigraph is known for its creative and innovative approach to caps and closures. Our team is on-point with current technology as well as having a keen sense of how closures impact overall branding. Our customized approach and willingness to not just let current designs stand as “good enough” are why Technigraph is continually sourced as the closure decoration solution for the largest brands in the market today.

A HINT OF ELEGANCE

In an environment where products are carefully scrutinized by consumers, it's imperative thoughtful consideration is given on how to stand out on what can be quite crowded shelf space. Caps and closures can no longer be an after-thought, but should be considered an integral piece of any container decoration design. Our belief is that closures can highlight or even serve as a memorable icon for your product.

GOT FOIL?

Foil banding is an effective way to add a little glitz and glamour to your caps and closures. Technigraph's high-speed foil banding equipment can apply color or metallic foil banding around the entire circumference of the closure, at various banding widths up to 10mm. Choose from a variety of band sizes for both round and oval closures, for just a hint of elegance or a whole lot of impact on the part of the package consumers engage with most.
